GAYATHRI TULUGU

Srikakulam, Andhra Pradesh | gayathritulugu10@gmail.com | +91 7989727266

PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science and Engineering student (CGPA 8.83/10) with a foundation in C, C++, Python, Java and DBMS, seeking software development, full-stack, AI and data internships. Contributed UI development to a team-built Flutter ride-booking app and is currently completing a Cisco virtual internship in networking. Also completed virtual internships in Android development, AWS data engineering and cybersecurity.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java
Mobile Development: Flutter, Android development
Databases: MySQL, DBMS
Networking and Security: Cisco Packet Tracer, network configuration and troubleshooting, network security fundamentals
Embedded / IoT: ESP32
Cloud and Data: AWS data engineering fundamentals, ETL, data pipelines
Core CS: Data Structures, Database Management Systems
Tools: Git, GitHub, VS Code, Cisco Packet Tracer

EDUCATION

B.Tech, Computer Science and Engineering (Currently Pursuing) 2024 – 2028
Lendi Institute of Engineering and Technology, Vizianagaram
CGPA: 8.83/10 (up to 4th semester) | Coursework: C, Data Structures, Python, Java, DBMS

Higher Secondary (MPC), Sri Chaitanya Junior College, Srikakulam 2024 | 98.4%

PROJECTS

ZYRO | Flutter Team Project

- Contributed to a team-built, Flutter-based ride-booking platform similar to Rapido.
- Developed the Rider page and profile-related UI screens as part of the team's application.

NetSage AI | Cisco Packet Tracer, Network Troubleshooting

- Configured a network topology in Cisco Packet Tracer as part of Cisco virtual internship work.
- Identified and fixed connectivity and configuration issues to restore working network operation.

SilentSense | AI, IoT, Sensor Fusion Smart India Hackathon Concept

- Designed a concept for context-aware emergency detection for elderly people or patients living alone, using sensor fusion to flag possible unresponsiveness.
- Proposed an "Are you okay?" check with the person before alerting a trusted contact, to reduce false alarms.

Voice Based Attendance System | ESP32, Speech Recognition, Database

- Developed a voice-command attendance system on an ESP32 microcontroller that records and stores attendance in a secure database.
- Automated attendance capture to reduce manual effort and improve accuracy.

INTERNSHIPS / EXPERIENCE

Cisco Virtual Internship Ongoing

- Working with Cisco Packet Tracer on network configuration and troubleshooting tasks.

Cyber Crime Awareness Campaign (Summer Internship)

- Conducted community awareness sessions on OTP scams, phishing, UPI fraud, fake calls and social media scams.
- Educated villagers on identifying online fraud, safe digital practices and reporting cybercrime through official channels.

CERTIFICATIONS

- NPTEL Elite Certification (Top 5%) – Programming in Modern C++
- NPTEL Silver Certification – The Joy of Computing using Python
- Data Engineering Virtual Internship – AWS
- Android Developer Virtual Internship – EduSkills
- Cybersecurity Virtual Internship – AICTE
- Fortinet Network Security Associate (FNSA)
- Google Android Developer Training
- Prompt Engineering for AI
- Employability Skills – EduSkills
